About Jos; "I have been communicating with pets since I was a child. I am also human and animal medium: I can connect with the departed. What makes me unique is that I worked as a criminal investigator, scientific research project manager, veterinary practice manager—my experience gives me laser focus in detecting answers and solving issues with compassion and positive results. I use my abilities as a clairaudient, clairvoyant and medium to assist in the areas of animal communication and medium work.

Our session will begin with you giving me your name and your animal's name, or the name of the departed being to be contacted. I then need just a little background to your questions, and we start the communication/session."

Session Prices are:

60 minutes \$100, 40 minutes \$70, 20 minutes: \$40
